

The future of regenerative medicine is here. Peptides are dramatically changing lives for those seeking longevity and well-being.

TIRZEPATIDE (SQ INJECTABLE)

Tirzepatide is a weekly at-home injectable that regulates blood sugar, appetite, stomach emptying, and glucose production. Our version includes Vitamin B12 (Cyanocobalamin) to reduce fatigue, nausea, support hair growth, and boost metabolism.

- Healthy Weight Loss
- Balanced Glucose Levels
- Reduced Food Cravings
- Increased Energy
- Supports Healing Hair, Skin and Nails

SERMORELIN -HGH (SQ INJECTABLE)

Another powerful growth hormone-releasing peptide is Sermorelin. Just like Ipamorelin, Sermorelin is a growth hormone peptide, but it works differently in the body than Ipamorelin (stimulating GHRH instead of ghrelin) to accomplish the same thing – stimulating growth hormone release from the pituitary gland.

- Increased lean body mass
- Accelerated wound healing
- Improved immune function
- Improved cardiovascular function
- Improved sexual performance and libido
- Improved sleep

PT-141 (SQ INJECTABLE OR ORAL TROCHE)

PT-141 works directly through the nervous system to increase arousal, desire, and satisfaction with sex. PT-141 gives you the desire and motivation along with the ability to achieve an erection, returning the intimacy and passion to your relationship.

- Improved sexual desire and performance
- Regained self-esteem and confidence
- Improved relationship with your partner
- Return to healthier sexual intercourse

MIC+B12 (SQ INJECTABLE)

MIC B12 is a potent injection for fat burning, liver support, and energy boost. Enhances metabolism and energy levels when combined with vital amino acid methionine and B-12. It is vital for overall health and weight management.

- Increased energy and prevents fatigue
- Improved mood, thought process, and memory
- Lowering cholesterol levels
- Keeping skin tone healthy and nails strong
- Promoting healthy hair growth
- Improves red blood cell health

SEMAGLUTIDE (SQ INJECTABLE)

Semaglutide, a synthetic GLP-1 analog, resists degradation by the DPP-4 enzyme, prolonging its effects in the body. It's FDA-approved for obesity treatment and has demonstrated effectiveness in non-Type 2 diabetic patients for weight loss. Your prescribed dosage requires a gradual titration to reach the maintenance dose.

- Healthy weight loss
- Appetite control
- Balanced glucose levels
- Meal portion control
- Reduced food cravings
- Hgb A1C reduction
- Decreased risk of adverse cardiovascular events

GLUTATHIONE (SQ INJECTABLE)

Glutathione, a cellular antioxidant made from three amino acids (glutamine, glycine, and cysteine), can decrease due to factors like poor nutrition, toxins, stress, and aging. Injections clear toxins and free radicals, providing benefits such as improved skin, liver health, insulin resistance, Parkinson's relief, potential help with autoimmune diseases, and symptom relief in uncontrolled diabetes and respiratory issues.

- Reduce oxidative stress
- Reduces side effects of stress
- Detoxification of the liver and cells
- Improve athletic performance and recovery
- Boost immune function
- Increase energy
- Improve sleep
- Reduce toxins
- Improves skin
- Slows down the aging process
- Improves mental focus and clarity

NAD+ (SQ INJECTABLE OR ORAL TROCHE)

NAD+ is a vital co-enzyme essential for enzyme function. Abundant and crucial for energy production, DNA integrity, and overall cell health. Key to preventing aging and disease. Powers cell energy production, ensuring survival and function

- Promotes cognitive and sensory function
- Restores cellular energy, mitochondrial dysfunction
- Autoimmune Diseases
- Depression and anxiety
- Drug addiction and detox
- Recovery from cellular injury
- Protects against cardio-and cerebrovascular disease
